EDUCATION

Thapar Institute of Engineering & Technology

Aug 2024 – May 2028

Bachelor of Engineering in Computer Engineering | CGPA: 9.04

Patiala, India

- **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Object-Oriented Programming, Database Management Systems, Computer Networks, Discrete Mathematics, Differential Equations & Linear Algebra, Numerical Linear Algebra

EXPERIENCE

Event Management Team Member

Dec 2024 – Jan 2025

Thapar Mathematical Society

Patiala, India

- Coordinated logistics for the annual technical fest **Shoonya 5.0**, ensuring smooth execution across all event phases.
- Hosted stage sessions and facilitated audience engagement activities, increasing attendee interaction.
- Produced presentation decks and event visuals for promotional campaigns and stage displays.

Core Member & Technical Coordinator

Aug 2024 – Present

OWASP Student Chapter

Patiala, India

- Launched the official website for **HACKOWASP 8.0** using the MERN stack, handling registrations, schedules, and access control.
- Served as technical coordinator for the **XPLOIT CTF** platform, overseeing competition workflows and onboarding.
- Spearheaded sponsor outreach, social media promotion, and full-cycle cybersecurity event coordination.
- Produced UI mockups, event creatives, and digital assets using **Figma**.

PROJECTS

SitWise – Library Seat Booking System | MERN Stack (MongoDB, Express.js, React.js, Node.js)

Jun 2025 – Jul 2025

- Architected a full-stack library seat reservation platform serving multiple concurrent users, automating seat allocation and eliminating manual booking overhead.
- Implemented live seat status tracking with instant updates across booked, available, and reserved states.
- Designed and secured REST APIs for reservations, cancellations, and seat management using Express.js with request validation middleware.
- Structured MongoDB schemas for reservation records and user data, reducing average query response time through indexing.
- Built a responsive React.js interface enabling intuitive seat selection, booking confirmation, and cancellation flows.

OWASP Quiz Portal (CTF Platform) | MERN Stack (MongoDB, Express.js, React.js, Node.js)

Oct 2025 – Nov 2025

- Deployed backend services for the XPLOIT CTF quiz platform, supporting 100+ concurrent participants across live competition rounds.
- Engineered REST APIs for question delivery, team submissions, score calculation, and live standings management.
- Designed MongoDB collections for questions, participant responses, and competition data with efficient indexing for low-latency reads.

CTF Portal | React.js, Convex

Mar 2026 – Apr 2026

- Constructed a Capture The Flag (CTF) web platform for cybersecurity competitions, enabling live challenge submissions and instant scoring.
- Built a React.js frontend for registrations, challenge access, score updates, and dynamic standings tracking.
- Integrated Convex for low-latency data synchronization and multiplayer state management across distributed clients.
- Introduced gamified power-ups – **Attack**, **Shield**, **First Blood**, and **Hide from Leaderboard** – to boost competitive engagement.
- Scaled the platform to support 500+ participants with live standings updates and concurrent challenge management.

TECHNICAL SKILLS

Languages: JavaScript, Python, C, C++, SQL

Frameworks & Runtime: React.js, Node.js, Express.js, Tailwind CSS, Convex

Databases: MongoDB, PostgreSQL

Tools & Platforms: Git, GitHub, VS Code, Figma, Vercel, Postman

ACHIEVEMENTS

HackSpire 2025 – Hackathon Finalist

2025

Thapar Institute of Engineering & Technology

Patiala, India

- Ranked in the **Top 15 out of 200+ teams** in a time-constrained offline hackathon for building a scalable full-stack solution.

Innovate 2025 – Hackathon Finalist

2025

NIT Bhopal & Thapar Institute of Engineering & Technology

Online

- Selected as a **finalist among 300+ teams** for a technical solution evaluated on implementation quality and innovation.
